

ARTIFICIAL INTELLIGENCE

MASTER WORKSHOP

Foundations and Society
Mobility and Work
Environment and Sustainability
Health and Medicine
Education and Culture

September 23rd – 27th, 2019

Dear student,

We kindly invite you to this year's workshop week on artificial intelligence (AI) and space taking place from September 23rd – 27th, 2019 as the official start of the semester.

During the first four days you will work with other master students in interdisciplinary teams of different planning disciplines. You will start with getting input from experts and debating challenges and opportunities of artificial intelligence and its impact on society and everyday life. Together you will continue exploring scenarios and formulating visions around artificial intelligence and its implications for planning and designing spaces. By the end of the week you will have worked on concepts for AI-powered solutions while getting in contact with a variety of design methods and tools. We will then round up the week with presentations on Friday in Detmold.

We are very much looking forward to a great workshop week with you.

For registration, please follow the link below:

<http://www.th-owl.de/fb1/studium/workshop/>

(Participation is mandatory for master students of the Detmold School for Architecture and Interior Architecture.)

Sincerely,

Prof. Dipl.-Ing. Carsten Wiewiorra (Dean FB1)
Prof. Dr.-Ing. Christoph Nolte (Dean FB 3)

Workshop

September 23rd – 27th, 2019

Presentation

September 27th, 2019

Location

OWL University of Applied Sciences and Arts, Detmold
