*This international summer school is sponsored by Hochschule Bremen and the International Office of Innos.*
During the summer school students will have lectures, visit many important companies of the region Ostwestfalen-Lippe and also hike from a city to another. The departure is in Paderborn and the arrival is in Schloß Holte Stukenbrock. The aim of these activities is to get closer to other international students and professors, to build a good team, helping each other and solving problems together. For this reason, we will reduce the use of cellphones. We hope that everyone will accept our rules. Participants will be accommodated in youth hostels.

180€ for students, including board and lodging for the entire period

To survive in a global competition, companies must continue developing their production towards excellence. Many aspects play a great role, e.g. the international dimension of the supply chain and recent development like digitalization and industry 4.0. But also the actuators with their personal / soft-skills have a major influence on this process.

We explicitly want to address all students of production engineering and management, wood-technology and wood-engineering but also logistic and industrial engineering. With our partner university, we have arranged credits for students, who participate at the summer school. Furthermore we invite alumni and first-time employee.

Ostwestfalen-Lippe University of Applied Sciences
Dep of Production Engineering and Management

INTERNATIONAL SUMMER SCHOOL
TOWARDS PRODUCTION EXCELLENCE

23rd September - 3rd October 2018

- What effect does this have especially on industrial production plants and its sub-suppliers?
- What knowledge and responsibilities aside from the regular study content will be demanded of specialist and of executive staff?
- Are there any specific examples which could be a helpful orientation in particular for students at a higher education stage, alumni and young executives?

The summer school 2018 „Towards Production Excellence“ will give precise answers to these questions.
