

# Internship Lighting Design

winter semester 2023/24 summer semester 2024

## We are

a design-oriented lighting planning office in the heart of Dresden's Neustadt. We plan innovative light and lighting solutions in the field of tension between architecture, technology and art.

## With us

you get the opportunity to apply and deepen your knowledge in real planning practice. For example, you research project-relevant information, develop presentations, create drawings and visualizations, build models, accompany lighting tests or support us in the realization and documentation and documentation of our projects.

## You practice

in the experienced office of a renowned lighting designer who has worked on many well-known projects for over 20 years. You will get a valuable experience background in a very attractive and future-oriented design field. You will work on innovative and attractive projects. At the end of your internship you will receive a certificate from us and in case of excellent performance there is the possibility of a longer-term employment.

## You have

pleasure in finding individual solutions? Are you familiar with reliability and work are not foreign to you? Do you have experience with CAD programs, Adobe the flexibility to learn new applications? You have time management skills or are you willing to develop them? You are interested in international trends and developments in lighting and architecture? ...and you have a positive attitude?

Then we look forward to receiving your application by e-mail to:
